

EMMANUEL ALFONSO B. CIENCIA

Sampaloc, Manila • +63-945-775-3085 • emmanuelalfonsociencia@gmail.com • linkedin.com/in/emmanuel-alfonso-ciencia-1597251b1 • dev portfolio: eabcdev.com • github: github.com/EABC-25

Career shifter with a strong dedication to continuous learning and growth, eager to contribute as a software developer by applying practical skills and building real-world solutions.

PERSONAL PROJECTS

CompareWOT?

- is a frontend web app for comparing tank statistics from the game **World of Tanks**. Users can add, edit, remove, and compare tanks in a spreadsheet-like interface for easy stat analysis.
- Built as a single page **React** application using **RTK Query** for efficient fetching and caching of live tank data from the official World of Tanks Developer API.
- **Tech-Stack:** Vite, React, Redux Toolkit-Query, CSS3, Axios, Git, Github, Vercel for hosting
- Optimized for Mobile – Desktop screen sizes.
- **Live Demo:** compare-wot-app.vercel.app

Y?

- is a full-stack web app inspired by the social media platform X. This project reproduces X's core features and provides users with a functional, minimal clone of X's user experience and UI.
- Users can create their personal accounts, create-delete posts and replies, follow and be followed by another user, upload profile/header photos, update user information etc.
- Developed with **TypeScript** for type safety and **Zod** for data validation; **RTK Query** handles efficient data fetching and caching from a Node.js backend that follows **RESTful API** principles and uses a **MySQL** database for relational data storage, hosted alongside the backend for low-latency access.
- Secured backend communication with **CORS**, **HTTP-only cookies**, security headers (**Helmet**), proper proxy trust configuration for secure header forwarding.
- Deployed on a **Hostinger Linux VPS** using **OpenLiteSpeed** as a reverse proxy and process manager for secure and efficient backend and frontend delivery.
- Optimized for Mobile – Desktop screen sizes.
- **Tech-Stack:** Typescript, Tsc, Vite, React, React-router, Redux Toolkit-Query, CSS3, Tailwind, Custom Web Components, Nodejs-Express for the backend, MySQL for Database, Cloudinary for media storage, Git, Github, Hostinger Linux VPS for hosting
- **Live Demo:** y-app.eabcdev.com
- **Backend:** twitter-clone-backend.eabcdev.com (redirects to health check)

Sql-Tools

- Sql-Tools is a CLI tool I made specifically for migrating MySQL data from my local machine to my Hostinger VPS.
- **Tech-Stack:** Typescript, Typescript Compiler, Nodejs, MySQL, Git, Github
- **Code:** github.com/EABC-25/sql-tools

PROFESSIONAL EXPERIENCE

Conduent Business Services Philippines Inc

May 2017 – March 2024

Documentation Associate

- Tasked to assist candidates through the onboarding part of the recruitment process

Offer Specialist/ICIMS Specialist/Talent Acquisition Associate

- Assisted recruiters in processing candidate dispositioning, rejecting, offer approvals requests and candidate hiring through ICIMS

HR Recruiter

- Recruited, Interviewed, qualified candidates; provided job offers to passers; managed candidates through the recruitment process

EDUCATION

Polytechnic University of the Philippines Sta. Mesa, Manila

2014

Bachelor of Science in Clinical Psychology

SKILLS & OTHER

Programming Languages: JavaScript, Typescript, SQL, Python, Core Java, C++

Others: Korean - TOPIK Certified (Level 2), English, Computer hardware knowledge, Version control basics, Basic command line (Windows, Linux) usage, Basic networking and VPS server management (Openlitespeed), Firewall and Security basics, SSH, Domain and SSL setup, Effective googling, Reading/Analyzing documentation, use of AI Tools (ChatGPT)
